**IN ADDITION** to the required components outlined above, for Final Plat review and approval, the following components may be required of the applicant by the Development Review Board:

- a) A letter from the Selectboard indicating its approval of construction details for any proposed public road. Road profiles shall show accurate existing and finished grades together with typical cross-sections and construction plans, including details of the drainage structures, banks, etc., in conformance with the Public Works Specifications and shall be certified by a registered professional engineer.
- b) A letter from the commissioner of the water district, if the development is proposed to be served by public water supply, stating that the water district has adequate capacity to serve the development and noting any improvements or modification necessary to serve the development.
- c) Evidence from the applicant, if the development is proposed to be served by private water supply for two or more connections that establishes adequate quality and quantity of water. The DRB may require the applicant, prior to approval, to make one or more test wells if additional evidence is required.
- d) A letter from the Underhill-Jericho Fire Department affirming its ability to provide adequate fire protection or noting any improvements or modification necessary to gain that ability.
- e) A letter from the Chittenden East School District Superintendent addressing the effect of the development on the capacity of the school system.
- f) Results of two [2] percolation tests and two [2] test bores dug to seven [7] feet on each proposed lot, and the design of the proposed septic systems by a registered professional engineer.
- g) Engineering and construction details of stormwater drainage system.
- h) Any proposed covenants and/or deed restrictions intended to cover all or a portion of the development.
- i) The following endorsement on each section of the applicant's final submission to be completed by the Chair of the DRB or designated representative, upon approval:

<b>Approval by the Jericho Development Review Board</b>

Re: Conditional Use Zoning Permit Application – CH95

Please accept this letter and subsequent documentation as our application and permission request for the following proposal.

**Project Proposal**

We are currently requesting approval to build a new 40x108 Barn for storage purposes on the back/side portion of our 2.02 acre property at 95 Cilley Hill Road. Currently, our property has Conditional Adaptive Use permit for the existing 40 x 170 chicken coop building for the use as a storage facility, and will continue to be used accordingly. We would like to apply for a separate conditional use permit under Section 4.3 table under "4.2 Warehousing" for this new structure.

**Proposed Structure**

The proposed new barn would be a newly constructed building for personal, as well as business storage to be built this summer. The main purpose would be to provide additional storage space for owner's equipment and personal items. With this building, we would be able minimize outdoor storage of equipment and other possessions which should result in an overall improvement in aesthetics for our friends and neighbors. This building would match all the requirements for an attractive barn that fits well into an agricultural area. We would use this building to provide additional long term and seasonal storage for cars, trucks, boats, and equipment. We have been providing automotive storage since 2006 when we bought the barn under the conditional adaptive use permit obtained by the previous owner Jay Austin on 5/3/2000.

## **Nature of Conditional use for Proposed Building**

The intended use of the building will be for storing cars, trucks, boats and equipment. Approximately 30 cars will fit in the space. Any addition of boats or trucks mixed in with these stored cars will decrease the total amount of storage customers and overall traffic to and from the building.

Our winter storage season is October through April. When cars arrive in the fall, it is usually in amounts of 1-8 on a given day. Cars go into the barn immediately after they arrive since most have been cleaned and detailed; and owners don't want them out in the weather. Also, since one owner, Jamie Bullivant, lives at 165 Cilley Hill Rd, we put cars into storage fairly quickly. When cars are moved out at the end of the season, we try to schedule as many cars as possible for pickup for a particular day. Occasionally 1-4 will be outside in April over the course of a few days waiting to be picked up. The days that we move cars in or out of the building are based on the weather. We select dry days such that Cilley Hill Road is not wet since most people do not want to get their cars dirty.

When cars need to sit for a few days waiting for pickup, we are planning on utilizing a grass area between our existing fence and our new barn which will block the cars from view. We have a number of vehicles outside this year due to lack of space. We will be moving these cars and trucks inside and out of public view. We will comply with Jericho's town regulations for the number of vehicles located outside on our property.

## **Fire Safety Review**

We have talked to the Jericho Town Fire department chief regarding our building and fire protection. We submitted a letter to notifying them of our proposed use and requesting suggestions and requirements for fire safety. We are looking into the possibility of installing a fire alarm panel and heat sensing wire in the ceiling of the new building for additional protection. The fire alarm panel would notify an alarm monitoring company via a land line. Jericho Fire Department would be notified via the alarm monitoring service.

## **About the new building:**

The new building would be 40' wide by 108' long. It would be a high quality steel and wood combination structure manufactured by Worldwide Steel Buildings. The roof would be galvanized to match the existing roof on the old barn. The siding would be red, and the trim would be white. We would pay a premium to get a 4:12 pitch, cupolas, and a 12" overhang all around for aesthetic reasons. We would have a white roll up door in the front, a person door, and divided pane windows to match the character of the existing old barn.

**Curb Cut:**

We will be using our existing curb cut to access the new barn and will be driving on the grass to access the building. Per DRB preliminary sketch review comments, we have obtained the appropriate permit and recommendations from Jericho Highway Department as requested. (see attached). Only minor modifications were recommended – to remove an existing set of bushes by the existing mailbox to improve line of site; as well as comply the dimensional requirements.

**Services and Lighting:**

This building will have electrical service brought to it underground from the existing barn with a sub-panel located inside the building. We will have interior lights and one exterior motion sensing light with (2) 120w bulbs, 10ft off the ground, located on the front of the building pointing down to the ground. The particular light model we are considering is: Defiant Model # DFI-5415-WH Motion Sensing Outdoor Security Light. We have no water or sewer services, and will not be adding water or sewer at this time.

**Parking:**

We have an available parking space created behind our existing fence and in front of our building which has space for (8) cars. We will use this space for cars temporarily left outside. We have a space in front of the old barn that is available for handicapped parking if that is required, this would require mounting a sign to the side of the building.

**Natural Screening:**

We will be removing some bushes and some small trees (less than 2" trunk size) on the property for the new building. We will be retaining existing trees and as much natural bushes as possible. The bushes and trees along Downer Lane will be retained for screening, and we will be adding shrubs and small trees to fill a gap in the natural screening on Downer Lane.

**Fencing:**

We will be re-using the majority of our existing fencing. We will remove a section to the back of the property to make space for the new building. We will relocate and purchase new fencing for the back property to shield view of our building from the neighbors on Downer Lane.

**Signage:**

We currently do not have signage, and we will not be adding signage.

**Lot Coverage calculation:**

Agricultural Zoning District limit is 30%.

**Our Structures**

Old White Chicken Barn	6800 SF
Red barn	2400 SF
Proposed Barn	4320 SF
Total Lot Coverage	13,520 SF
Lot size	2.02 acre or 87,991 SF
Percent Lot Coverage	15.4%

**About our Business:**

We have been operating a storage business since buying the barn in 2006. Over the past 9 years, we have provided storage for many folks in the Jericho community and surrounding area. This has been a great benefit to many neighborhoods. In addition, we have channeled the income from these rentals toward renewing the buildings and property. While we have more to do aesthetically, we have focused our income on improving infrastructure of the existing buildings. We have since replaced the existing roof and other exterior improvements to the old barn. The barn has filled up over time with personal items and customer items. We are 100% full and have turned customers away for the last 2 years. We would like to expand our storage operation. This building would fulfill our current long term plans for expansion.

Additional information is attached.

Please provide a review of our proposal and advise us on the appropriate direction to for conditional use permit, and obtaining a building permit.

Thank you for your time, and we look forward to working with you.

Regards,

Clint Calderwood  
Jamie Bullivant  
Owner

## PROJECT PROPOSAL AND INFORMATION

What: Construction of a 4,320 Sq.ft Barn (40' x 108')

Where: 95 Cilley Hill Road, Jericho Vermont 05465

When: Est. Construction Date – June to November of 2016

Property Parcel: CH95

Current Zoning: Agricultural

Ref Documents:

1. Attached drawings
2. Adaptive Use Approval granted by DRB – May 3, 2000 to convert an existing chicken coop barn to a warehouse /storage facility. See Town Records.

### Construction Type:

Pending Town approval, we intend to construct a 4,320 Sq.ft pre-fab barn kit of approximate dimensions of 40 feet by 108 feet. The building would be built on a standard –at grade concrete slab. The building would have 14 foot high, and be less than 21 feet at the building peak based on a 4/12 pitch. The building would be mostly steel framed; with red-barn-like steel siding. The building would maintain (1) main garage door on the gable end, (1) garage door facing the existing barn (south), (3) people doors and several standard windows.

### Property Location:

The building would sit approximately 40' aside the existing chicken coop building leaving 128 feet of free space to the back of the property line. The building would be backed up to the West property line while maintaining the minimal 35' set back requirements. The location is chosen to minimize any visual exposure to our existing neighbors; while maintaining the best possible use of our land.

### Construction Cost:

Construction cost of the project is estimated at \$44,000.

## VT Barnfinds LLC Hours of Operations and current/proposed traffic estimation

### **Car storage numbers**

- Old Barn = 40 cars
- New Proposed Barn = 30 cars
- Total number = 70 cars

### **Current Warehouse traffic**

- General warehouse traffic round trips = 156
- Seasonal car storage round trips (approximately 40 cars) = 180  
(This number includes both owners, stored car, and a ride for the person storing the car)
- Total Current Warehouse traffic round trips = 336
- Current permitted round trips per year = 1300  
(Current conditional use is 3-5 trips per day)
- Current traffic is 26% of permitted use

### **Proposed Warehouse traffic round trips**

- Seasonal car storage round trips (approximately 30 cars) = 90  
(This number includes stored car, and a ride for the person storing the car)
- Total Proposed additional Warehouse traffic round trips = 90
- Total projected traffic would be 33% of permitted use

### **Comparative traffic flow**

- Typical residence, 50 work weeks, 2 cars, 5 work days, 4 trips per weekend:  
Total round trips per year = 708
- Current VT Barnfinds usage total round trips = 301
- Projected VT Barnfinds usage total round trips = 426

### **Seasonal Car Storage Warehousing hours of operation, existing use and future use**

#### Spring

- Spring move out is (4) weeks' time which fall in the range of April 1 to May 1
- We move cars out 2- 3 days a week. (2) week days and (1) weekend day, 8am to 7pm.

#### Fall

- Fall move in is 6 Weeks' time, since some people like to drive up to snow fall time, these dates fall in the range of October 15 to Dec 1
- We move cars in 2-3 days a week. (2) week days and (1) weekend day, 8am to 7pm.

### **General Warehousing hours of operation, Old Barn**

- We still have truck deliveries to the old barn M-F, 9am-3pm for our 10+ year customer, GTG Growers, covered under the original conditional use permit for the Old Barn. This use will not change.

## Reference table for traffic estimates

**Traffic Impact Estimation Table 1**

Current Conditional Permit
- Ave. 3-5 per day; not to exceed 8 trips per day. ' - Tractor Trailers limited between 9am-3pm and 3/ week
5 Per Day
5 Days per Week
52 Weeks per Year
1300 Trips/Year

Current Usage
- Regular Storage Renter plus ' - Season Storage Customers
6 months at 1 / Week= 52/yr
6 months at 2 / Week = 104/yr
Season Car Storage - 145/year
301 Trips / year
or 26% of Conditional Permit

With New Building
- Regular Storage Renter plus ' - Season Storage Customers
6 months at 1 / Week= 52/yr
6 months at 2 / Week = 104/yr
Season Car Storage - 270/year
426 Trips / year
or 33% of Conditional Permit

Reference Benchmark
Based on a standard single family residence with 2 cars.
2 car household, 2 people working
2 cars/ per day -weekdays = 500/yr
2 trips / per day - weekends =208/yr
708 Trips / year

Vermont BarnFinds, LLC  
95 Cilley Hill Road  
Jericho, VT 05465

Owners:

Jamie Bullivant – 165 Cilley Hill Road, Jericho Vermont  
Clint Calderwood – 236 Poor Farm Road, Milton Vermont

Date: March 3<sup>rd</sup>, 2016

Attn: Town of Jericho Fire Department

The Town of Jericho requested us to contact the Jericho Fire Department prior to our project application on 3/29/16. We would like to receive recommendations and suggestions for our proposed building regarding fire safety as related to its intended use.

We in the process of applying for approval to the Town of Jericho to build a 40x108 Barn on the side portion of our 2.02 acre property at 95 Cilley Hill Road. This requires a conditional use permit for 'light warehousing' in the agricultural district. Currently, our property has an existing 40 x 170 (formerly a chicken barn) for the use as a storage facility under an adaptive use conditional permit and will continue to be used accordingly.

The proposed new barn would be for the storage of cars, trucks, boats, and equipment. This building would have space for approximately 30 cars. We store cars for the winter season, October through April. We move the cars in to the building, remove keys from ignitions, and disconnect the battery leads for the season. This is a limited access building. Owner access only, customers may access accompanied by an owner.

The building will be a manufactured, PE stamped/approved steel structure, sitting on concrete slab, with wood girts and purlins, steel roof and steel siding. There will be (2) rollup doors and (2) man doors. There will be power installed to the building for lighting. Lighting will be (8) to (10) 2'x4' fluorescent lights. There will be no heat or water in the building. We have no water available on out property.

A drawing of the property is attached.

Thank you for your time.

Regards,

James Bullivant  
Clinton Calderwood
